CHAPTER 1

Introduction

Blockchain

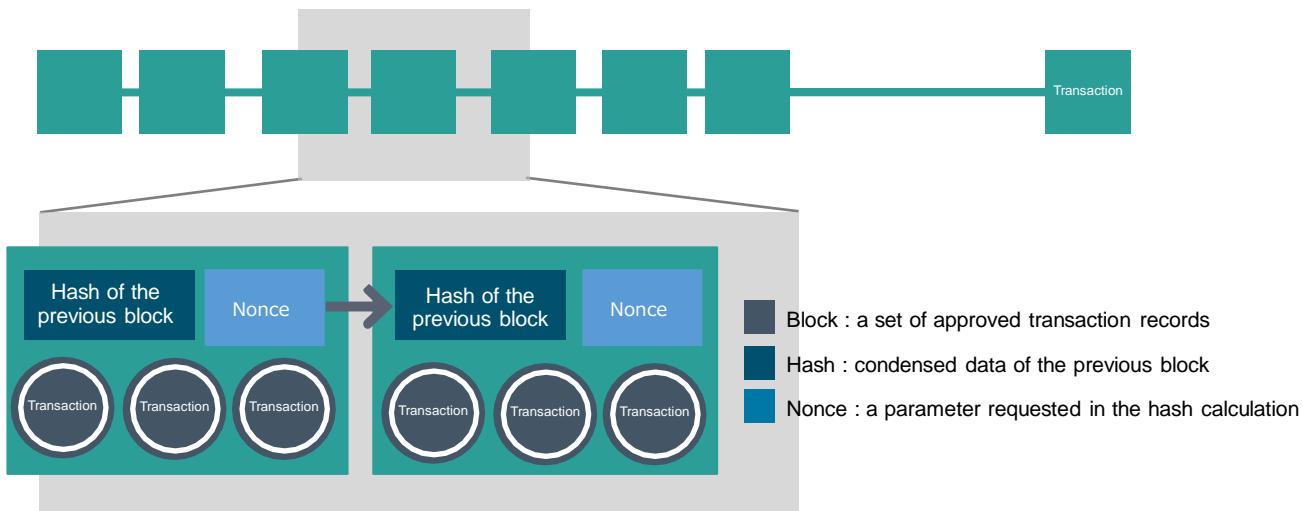

A blockchain is a Distributed Ledger Technology and Distributed database for recording transactions executed on the internet.

Data on the blockchain is shared worldwide without centralized systems or organization.

On the blockchain data units called "blocks" are generated at regular intervals and linked blocks form a chain to record data on a distributed database and it is executed by a communication processing nodes network which operates the software.

A transaction that a sender A sending cryptocurrency X to a receiver B is released on the network by an easy to use software application.

The network nodes confirm the effectiveness of the transaction, then add the data onto a copied ledger, then the additional message on this ledger can be transferred to another node. Unique blockchain copies are stored in each node.

CHAPTER 2

mameCoin introduction

2.1 Overview

Since the birth of Bitcoin in 2009, cryptocurrency has been gradually spreading as a borderless payment method.

Also, blockchain technology itself has been getting the limelight through cryptocurrency, and its various applications are being researched.

On the other hand, price volatility and fraud related to cryptocurrency are sensationalized in the media and we feel frustrated because we truly believe in the future of blockchain and cryptocurrency.

We asked ourselves whether we would be able to change the negative image of blockchain and cryptocurrency by combining them with donation.

This was the moment that mameCoin members who had gathered in volunteer activity in disaster areas banded together.

By combining blockchain technology with donation, the following are realized:

- Capable of proving receipt of donations to the destination wallet address
- Capable of preventing fraud because of no intervention of the third party.
- Capable of issuing the digital donation certificates with anti-tamper data

By combining the cryptocurrency with donation, the following are realized:

- You can donate whenever and wherever
- You can donate across the borders or nationalities

CHAPTER 2

mameCoin introduction

2.1 Overview

According to The CAF World Giving Index reported by Charities Aid Foundation located in the UK, Japan was the 111th in 140 countries.

How can we root the culture of donation and lower the barriers to donation in Japan?

We looked for suitable volunteer organizations steadily while testing our cryptocurrency, and we recognized the importance of the community based on the advice from people and organizations with lengthy experience and knowledge of donations.

Why not provide a platform in which people who want to collect donations, people who want to donate, and volunteer activists can interactively communicate, and the community members can socialize with each other by using the cryptocurrency and the blockchain technology.

In this way the idea for mameCoin donation SNS plan was born.

What should we do to get people from around the world to use mameCoin platform,

CHAPTER 2

mameCoin introduction

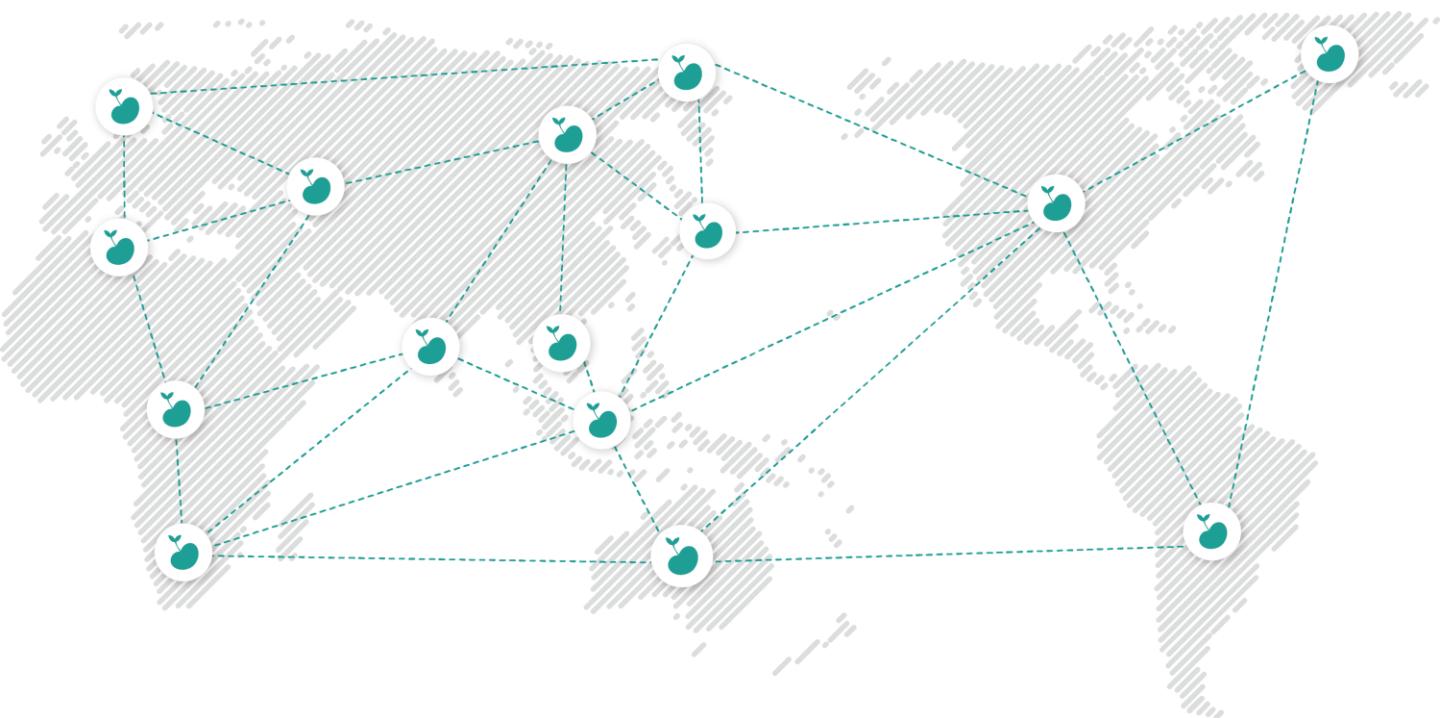

2.1 Overview

From Japan to Asia to the world

Our corporate members are from Japan and Indonesia, countries where natural disasters are prevalent, giving us many opportunities to witness them with our own eyes. However, natural disasters are only one part of many causes which need charity.

Starving children, lack of food supplies and infrastructure; these are global issues towards which somebody must take action.

Not limited to our offices in Japan and Indonesia, in order to expand our mameCoin Ecosystem globally we have ambassadors around the world in all regions to try to connect organizations and people together.

CHAPTER 2

mameCoin introduction

2.2 Our Goals

Our Vision

Make people all over the world happy.

Our Mission

Create a new model for donating that fits into daily life
To prove people's good intentions.

Our Strategy

Provide a SNS platform specific to easy donation
Using a blockchain technology, issue the anti-tamper digital donation certificates confirmable by anyone.

CHAPTER 2

mameCoin introduction

2.3 The issues of the current donation model

- **Difficulty of proving receipt of donation**
- **Unsuitable for small donation amounts**
- **Cross-border donations are costly and time-consuming**

Donating activities are great, however, these three big issues occur with the current donation model.

① Fraud

Unfortunately, there are cases of fraud pretending to be donating activity.

Hiring volunteers and temporary workers who have good intentions, defrauders solicit donations on the street and get money. Fraud like this is considered to be one of the leading causes people avoid donating.

② Amount of donations

Many donation drives on TV or on the internet normally set a minimum donation amount, so it is unsuitable for small donations. But even many small donations together make a big result.

Moreover, small donations themselves are easier to make.

③ Costs

Volunteer organizations themselves have operation costs. Therefore, there are many cases where the donation is already decreased drastically by the time that those in need receive it.

According to one theory, the actual amount which donees receive from one of the major charity organizations is 12%- 20% of the total amount gathered. Moreover, there are big costs involved with lengthy procedures and transfer commissions for international money transfers.

CHAPTER 2

mameCoin introduction

2.4 Value of mameCoin

With the mameCoin ecosystem, by using cryptocurrency and blockchain, the issues that exist within the current donation model can be resolved.

 **It is able to prove when and to whom a remittance transaction occurred.**

Using blockchain technology, people all over the world are able to check anytime who sent or who received donations, as well as the amount of donations sent.

Also, there is capability to issue donation certificates on the donation SNS platform based on mameCoin blockchain technology.

 **The minimum amount normally available to donate is a unit of fiat money (e.g 1 yen).**

On the donation SNS, based on the blockchain technology, a small donation amount can be accepted even when it is less than the minimum amount of a unit of Fiat money.

People can donate by clicking the "like" button on favorite contents.

 **Easy cross-border donation with very small fees by smartphone, PC, and tablet is provided 24 hours a day.**

Access to the mameCoin donation SNS is possible 24 hours a day by smartphone, PC and tablet.

Using blockchain technology, cross-border donation is done instantly with considerably lower fees than using a bank.

CHAPTER 3

mameCoin Platform

3.1 Overview

In the mameCoin platform, "people who receive donations (recipients)" and "people who donate (donors)" are connected, therefore it is easy to donate while checking activities of recipients.

■ For people who donate (donors)

Donors can search and browse the data of the recipients, so they can look into activities of the organizations and donate after they understand.

■ For people who receive donations (recipients)

For the recipients, by expanding the range for gathering donations, and making their own activities visible, the platform is useful for their public relations.

By adopting a badge system in which the more a user donates or receives, the more the user's rank goes up, we break the mameCoin platform away from the existing complicated donation model to become a user-friendly and enjoyable experience.

Badge system

By meeting certain conditions, a user is able to receive the badge.

The following are examples:

- Holding 10 million MAME
- Logging-in for 7 consecutive days
- Tipping more than one million MAME

CHAPTER 3

mameCoin Platform

3.2 Service introduction

Service Perspective

People who want to donate (donors) are able to send mameCoin by one click, and support easily.

Moreover, it is not only "money support", but also capable of sending cheering messages as "mental support".

People or organizations who want to receive donation/volunteer individuals/volunteer organizations (recipients) are able to receive donation (mameCoin) and publicise their activities and situations to many people widely by releasing their activities' information onto the mameCoin platform.

CHAPTER 3

mameCoin Platform

3.2 Service introduction

A list of functions

- Donor registration
- Recipient registration
- Recipient search
- Posting an activity
- “LOVE” on activities (Tip)
- Donation with a message to recipients
- Issuing donation certificates
- Chatting function
- Deposit and withdrawal in mameCoin wallet
- Badge system
- Checking donating history
- Premium services

Glossary of terms

- Donor
A person who donates
- Recipient
An organization who receives a donation/ a volunteer organization or individual
- Activity
Organized information of recipient's activities
- Donation certificate
mameCoin official anti-tamper digital donation certificates (pdf format) using Smart Contract.
Aiming to be official documents to apply for a tax deduction on donation.
- Badge
A badge is given in response to activities in the platform.
Titles are also given in response to a number of attained badges.

CHAPTER 3

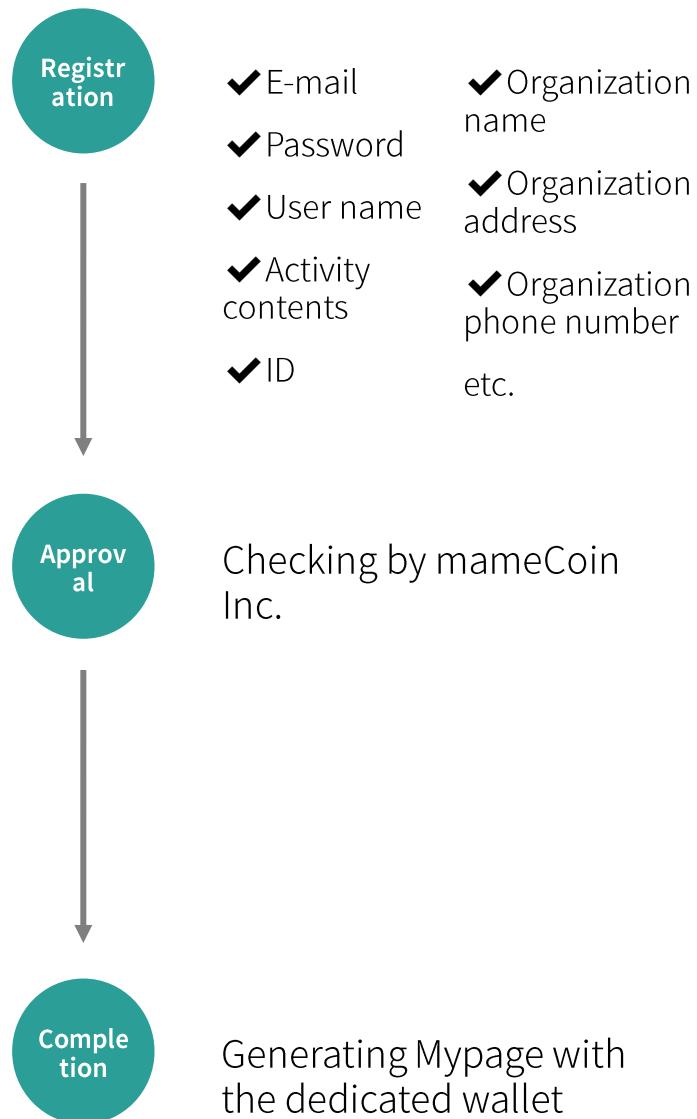

mameCoin Platform

3.2 Service introduction

Recipient registration

- A person or an organization who wants to receive a donation (recipient) is required to register on the mameCoin platform.
- The registered KYC information is strictly checked by us to confirm whether the recipient is a proper donation destination.
- After getting our approval, the information of the recipient is released and ready to be browsed.

CHAPTER 3

mameCoin Platform

3.2 Service introduction

Searching recipients

Able to search and browse the information of the people or organizations receiving donations (recipients).

CHAPTER 3

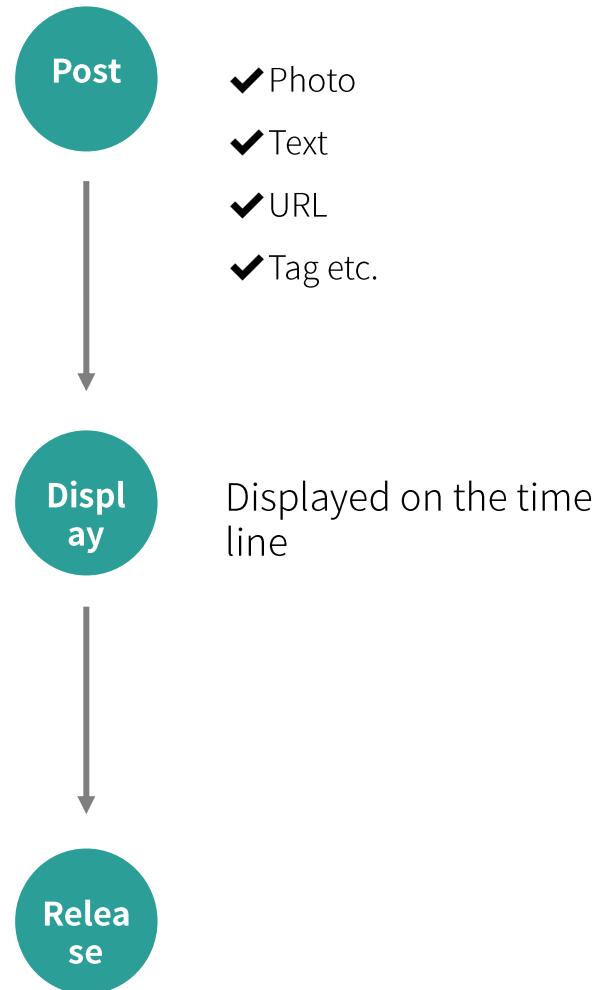

mameCoin Platform

3.2 Service introduction

Posting an activity

- The collation of information on activities, working people or organizations who want to receive donation (recipients) is called Activity.
- Posting and releasing the activities makes it easier for recipients to get more support from donors.
- Activities are checked by mameCoin Inc.
- In the mameCoin platform, not only are there "people or organizations who want to receive donations" but there are "individuals" and "organizations" working as volunteers who are able to receive support from donors by disclosing their activities as recipients.

CHAPTER 3

mameCoin Platform

3.2 Service introduction

Donation with messages to recipients

You can send any amount of donation with a message by one click on the recipient detail page.

Also, you can send a cheering message (option).

By donating through the mameCoin platform,

① Donation certificates are issued

Issuing the anti-tamper donation certificates

② 10% of donation amount is deducted as operation costs

Used for supporting costs to volunteer organizations

③ Burn 10% of the donation amount

Giving back to mameCoin holders through donation

Enter the donation amount

Please enter the donation amount after confirming a project you will donate to.

Supporting sake breweries

recipient | Shuzo NPO
duration | 2018.8.3 - 2018.10.31

Connecting "sake breweries", "restaurants, liquor shops" and "drink lovers", we work for spreading the Japanese sake to be loved by more people.

We propose various ideas based on 20 years of our experiences in a wholesale market, especially the relationship with restaurants.

We have seen many restaurants which can not try even they think to do something.
There are many things they can do even not spending a big investment(money and time).
People who can not get good result although they try many things might be in a little wrong direction to do.
How about trying small thing at first?

Enter the donation amount

CHAPTER 3

mameCoin Platform

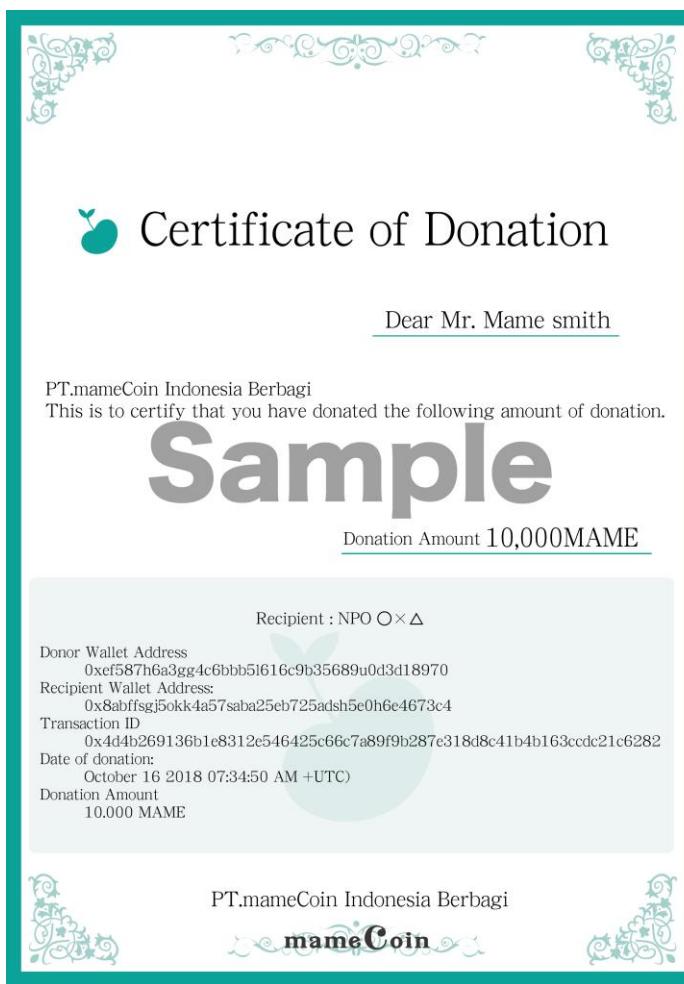

3.2 Service introduction

Issuing donation certificate

We issue mameCoin official anti-tamper digital donation certificates (pdf format) using Smart Contract.

Also, we aim that the certificates become official documents to apply for a tax deduction on donation in the future.

A minimum donation amount is planned to be set when issuing donation certificates.

In addition, mameCoin Farming (P.23) users will receive the benefits of paid channel benefits currently under development within mameCoin discord.

CHAPTER 3

mameCoin Platform

3.2 Service introduction

“LOVE” on activities (Tip)

You can click “LOVE” on each activity of donees.

Clicking “LOVE” means sending mameCoin directly.

The following types of tip amount are planned.

♡1 / ♡10 / ♡100 / ♡1,000 / ♡10,000

With these choices, we provide an environment in which everybody can participate in donation even when the tip amount is small.

In addition, within the mameCoin discord linked with the platform, there is a function that allows you to easily donate by simply stamping.

CHAPTER 3

mameCoin Platform

3.2 Service introduction

Chatting function

To vitalize the mameCoin platform, we provide a place in which users (regardless of donors, recipients) can chat freely with each other.

Deposit and withdrawal in mameCoin wallet

A deposit address and QR code are displayed. A mameCoin deposit is kept in mameCoin wallet in the platform. Also, a withdrawal request from mameCoin wallet is available.

Badge system (1/3)

We decided to implement a badge system in the mameCoin platform for enjoyable supporting. Furthermore, we are now considering a plan to introduce availability of premium services by attaining badges.

Moreover, we are planning to provide a rank system in which the rank goes up after the badges are issued.

We at the mameCoin project team are willing to realize that supporting activities such as "a person donating often" and "a person actively participating as a volunteer" and so forth, are accorded a good status.

CHAPTER 3

mameCoin Platform

3.2 Service introduction

Badge system(2/3)

Examples of badges

■ The badge for long term holders

Reducing selling pressures and enhancing holder's loyalty by encouraging long term holding.

Example: 【Holding Beginner】 Holding 10 million MAME in a wallet for 3 months.

■ Log-in badge

Gaining repeaters by encouraging daily log-in.

Example: 【Login Beginner】 Logging-in to the platform for 7 consecutive days.

■ Donation badge

Inducing users to become eager to donate more.

Example: 【Donate Beginner】 Donating more than one million MAME of total donation

■ "LOVE" (tip) badge

Encouraging frequent donation. Also, it becomes a motivator for activity posting by donees who receive "LOVE" (tip).

Examples:

【Love Evangelist Beginner】 Sending more than 100 thousands MAME of total tip

【Beloved Beginner】 Receiving more than 100 thousands MAME of total tip

CHAPTER 3

mameCoin Platform

3.2 Service introduction

Badge system (3/3)

Examples of badges

■ Activity badge

By encouraging users to post their activities, the platform gets vitalized.

Example: 【 Posting Beginner 】 Posting more than 100 activities onto the platform.

■ Follow badge

Increasing duration of visits by encouraging users to follow others.

Example: 【 Follow Beginner 】 Following more than 100 users.

■ Follower badge

By encouraging users to get followers, the platform gets vitalized.

Example: 【 Popular Beginner 】 Having more than 100 followers.

■ Mission badge

Mission badge can be attained by meeting particular requirements and functions as an entertainment factor on the platform.

Example:

【 Founder 】 Holding a volunteer event which more than 100 people participate in.

CHAPTER 3

mameCoin Platform

3.3 mameCoin Farming

Within the mameCoin platform, we will prepare "mameCoin Farming" where you can receive rewards according to the lockup rate of mameCoin. It is a system that you can get a certain reward every day just by locking up mameCoin with the pair (MAME / BNB, MAME / USDT) decided at the listing destination of mameCoin, and your life will be enriched. You can also donate your daily rewards to an organization of your choice and receive a proof of donation.

In addition, mameCoin farming users are entitled to a discount on the monthly subscription fee for paid channels currently under development within mameCoin discord.

To use this mameCoin farming, you need to lock up mameCoin with the pair determined by the mameCoin listing destination.

■ Rates of reward

When you lock up mameCoin with the pair decided at the listing destination of mameCoin. You can get LP tokens. 50 AZUKI will be distributed daily according to the percentage of LP tokens held. AZUKI TOKEN is a governance token for the mameCoin platform.

■ AZUKI TOKEN

■ Midterm cancellation

Users can cancel their deposit, however, rewards are not distributed.

CHAPTER 3

mameCoin Platform

3.4 business model

mameCoin will aim for early monetization through the development of the following contents and products.

■ Game content

- Slot (released the other day)
- Gacha (scheduled to be released)
- Other games

■ mameCoin discord Paid content

■ Other blockchain products

- Glolove donation execution certificate is converted to NFT
- Cross chain bridge (ERC20 <-> BEP20)
- NFT Marketplace
- Yield farming

3.5 Value improvement of mameCoin

mameCoin cherishes our community as a keystone of our project.

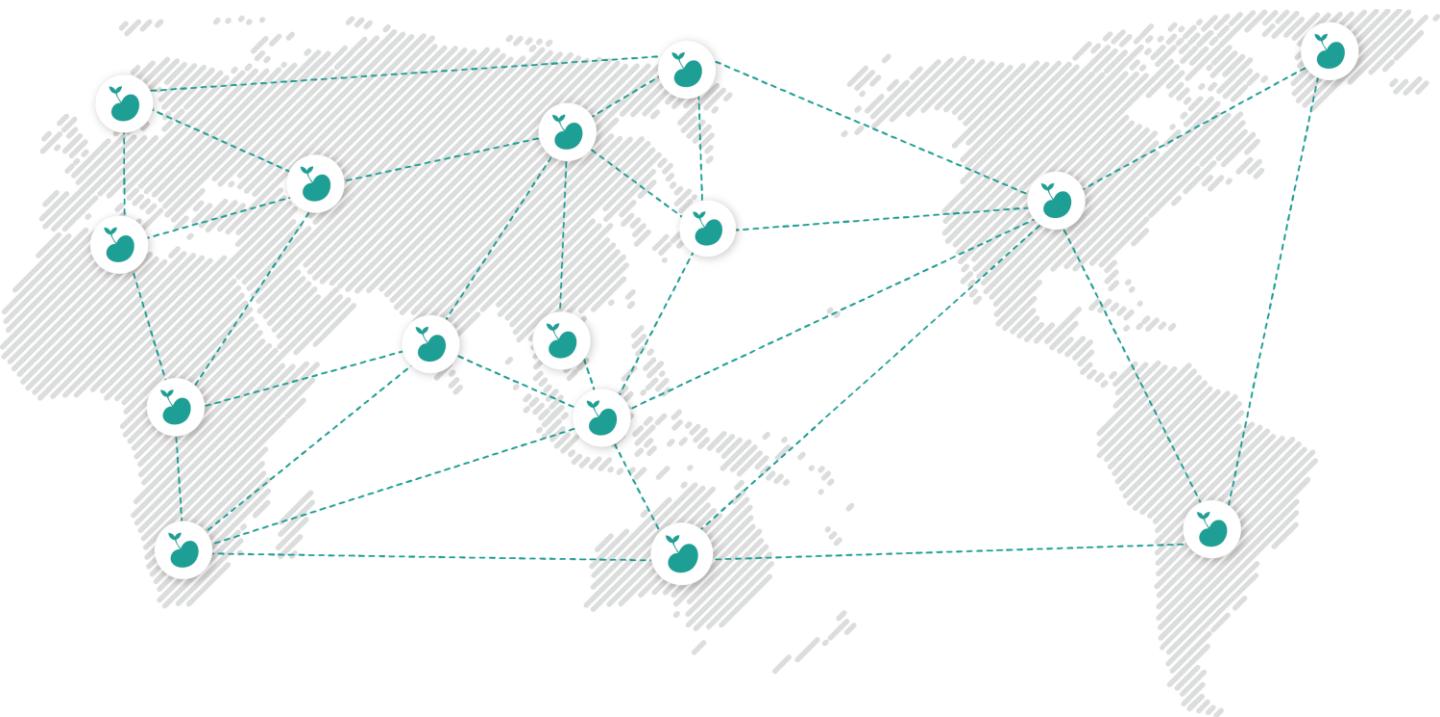

In order to return profits to users, we will use 10% of the profits of the mameCoin platform to make purchases from the market.

In addition, we will improve liquidity by increasing the content that can use mameCoin.

As a result, the more you use the platform, the more the value of mameCoin will increase and it will be a system that can be returned to holders.

CHAPTER 4

Partners

Our mission activities are not restricted to the internet.

In the mameCoin project, we connect with NPOs and other support organizations around the world, and provide relief funds and goods where required. Members of mameCoin project team actively go to the places we support, inspect the organizations, and check the flow of relief funds and goods after the donation. We also actively take part in the local volunteering activities.

Moreover, we have established a donation counter for supporting NPO and other partners, and have built a system for sending collected donation to them directly.

CHAPTER 4

Partners

Partner ①

JAPAN

NPO Rescue Assist

Supporting at the disaster-stricken areas around Japan as a multi-disaster coordinator, they arrange relief goods/ coordinate evacuation spot/ advise municipality to cope with disaster as the organization supporting people requiring assistance in a disaster.

CHAPTER 4

Partners

Partner ②

JAPAN, Philippines

NPO(特定非営利活動)法人

team RESCUE NPO team RESCUE

After The Great East Japan Earthquake happened in March 2011, they have continued volunteer activities managed by students, and established team RESCUE as an NPO (a non-profit organization) in August 2012 to start supporting disaster victims.

They have bases all over Japan, also they have it in Cebu Island Philippines.

Since they are capable of working in a wide area, they can support the disaster-stricken areas quickly.

CHAPTER 4

Partners

Partner ③

JAPAN

team NIPPON Jr.

This organization is working for supporting children such as educational support(Chiiki Mirai Juku by Ministry of Education, Culture, Sports, Science, and Technology) / daycare after school(Ministry of Health, Labor and Welfare) / children diner/children development support.

Running one of the biggest diners for children in Japan, and planning to deploy it all over Japan.

CHAPTER 4

Partners

Partner ④

Indonesia

Sekolah Relawan

They have original educational systems for disaster volunteers, and support at the disaster-stricken areas.

They are capable of supporting in most of areas of Indonesia.

CHAPTER 4

Partners

Partner ⑤

Philippines

NPO ACTION aims to realize the society where children exhibit their own natural ability and lead their own lives by breaking the cycle of poverty.

They have worked for the following three important activities in Philippines and Japan since 1994:

"Street children support" for reducing the number of children who need to enter an Orphanage.

"Orphanage children support" for properly caring for children who live there.

"Mothers support in needy areas" for the path out of poverty.

As an the organization certified by the Philippines government, NPO ACTION supports schools for the blind and the deaf, orphanages and street children.

Moreover, they are putting effort into reporting the current situation in the Philippines through the overseas volunteer program and the education program for international understanding in Japan.

CHAPTER 5

mameCoin Token

5.1 Token Specification

mameCoin is an BEP20 token, implementing its own proprietary expansions.

Listings on several exchanges are in progress.

Also since this is compatible with several wallets, it's secure to exchange the tokens.

Token logo

Token Name mameCoin

Token Symbol MAME

Standard BEP20 + Proprietary Expansion

Total Issue Amount 25 Billion Tokens

Proprietary Expansions Lock-up, Burn, Airdrop, etc.

Contract Address 0xABccaAdd77078A67622dFD5f74066ce4581c0a99

5.2 Exchanges

CHAPTER 5

mameCoin Token

5.3 Binance Smart Chain

Binance Smart Chain is an open-source, public blockchain, Ethereum based application platform utilizing smart contract functionality.

Ethereum is called the next generation of Bitcoin.

Whereas Bitcoin is a cryptocurrency for pure payment and remittance, Ethereum has a big feature such as "smart contract" technology which makes placing online contracts easier, added on to the basic features of blockchain technology which Bitcoin has.

In the smart contract, Ethereum provides Ethereum Virtual Machine (EVM) which is a decentralized Turing-complete virtual machine, and it can execute scripts using an international network of public nodes.

In addition, Binance Smart Chain offers a native token called "BNB (Binance Coin)", which can be used to pay remittance fees and buy and sell on exchanges.

5.4 BEP20

BEP20 (Ethereum Request for Comments) is the standard used for Ethereum blockchain's smart contract.

The BEP20 standard's tokens are currently compatible with many cryptocurrency exchanges, software and hardware wallets.

■ Major software wallets compatible with mameCoin

- Binance Wallet
- MetaMask (Google Chrome Extension)
- Trust Wallet

■ Major hardware wallets compatible with mameCoin

- Ledger Nano S
- TREZOR

■ A disadvantage of BEP20

- Extinction of tokens caused by misdirected remittance to the contract address.

CHAPTER 5

mameCoin Token

5.5 BEP20 Proprietary Expansion

mameCoin smart contract has the following proprietary expansions.

With these expansions, mameCoin is a hybrid token having new functionalities which are compatible with many cryptocurrency exchanges, software and hardware wallets.

■ Refund

Refund is for preventing the extinction of tokens caused by misdirected remittance to the contract address, which is a weakness of BEP20.

Holders can send a big amount of mameCoin securely.

To use Refund Function, an examination including identification is required by mameCoin inc.

■ Burn

Burn is for reducing the total supply of mameCoin.

By reducing the total supply, relative value of mameCoin increases.

■ Airdrop

Airdrop is for distributing a certain amount of mameCoin to unspecified large number of addresses.

This is used for various campaigns.

■ Lump-sum Transmitting

Lump-sum Transmitting is useful for developing platform applications and sending services.

By putting all destination addresses together, it reduces the time for sending which is normally required for each destination address.

■ Using SafeMath Library

There have been cases of illegal money transfer of some tokens abusing overflows of an arithmetic operation.

mameCoin uses SafeMath Library with no vulnerability caused by overflows of an arithmetic operation.

CHAPTER 5

mameCoin Token

5.6 Token Allocation

The breakdown as of May 29, 2021 is as follows.

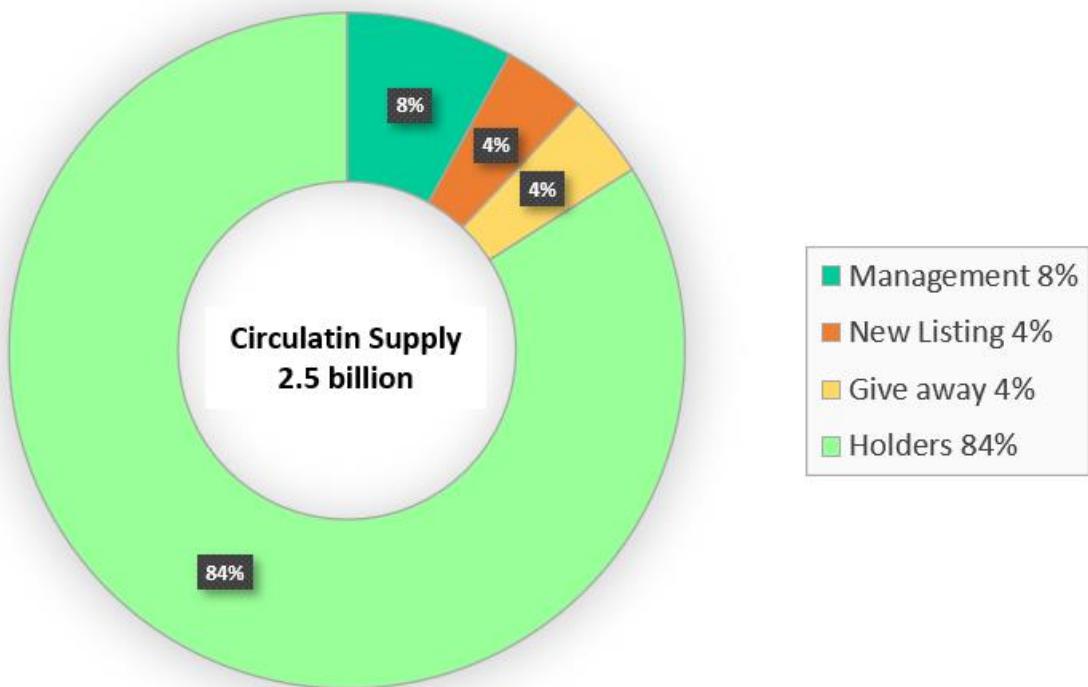

Management • • • 8% (200 million)

New Listing • • • 4% (100 million)

Airdrop • • • 4% (100 million)

Existing holder • • • 84% (2.1 billion)

mameCoin distribution

Road Map

2018
Q2

Project

mameCoin Japan is founded

Volunteer

Restoration assistance for Northern Osaka
Prefecture Earthquake

Partnership • Merger

Support partnership with NPO Rescue Assist

Q3

Project

- PT mameCoin Indonesia Berbagi is founded
- Contract for a corporate lawyer
- The first-ever mameCoin payment in Japan

Volunteer

Participating in volunteer activity supporting torrential
rain in western Japan

Holding a charity concert in Jakarta Indonesia

Partnership • Merger

Support partnership with NPO teamRESCUE
Business partnership with ELEMENTS CAPITAL INC.
Development business partnership with RUTILEA

Project

- Burn 1.5 billion of mameCoin (6%)
- Listing on CoinExchange
- Listing on DEXDelta
- Listing on TOKEN JAR

Merging Sensu into mameCoin
Business transfer of tipping service [Nage coin]

Project

- Listing on Nusax (Indonesian exchange)
- Rebranding
- Limited release of platform 1.0α
- Burn 2.75 billion of mameCoin (11%)

Q4

Volunteer

Visiting Philippines squatters (street children)

Partnership • Merger

Support partnership with team NIPPON Jr.

Support partnership with NPO sekolah Relawan

Support partnership with NPO ACTION

Building partnership many countries through
ambassadors

2019
Q1

Project

- Sponsoring an event held by Kiwanis Luzon branch
- Recruiting beta testers
- Conducting the beta test
- Launching the platform 1.0β version
- Burn 2.75 billion of mameCoin (11%)

Volunteer

Participating in volunteer activities continually

Partnership • Merger

Building partnership many countries through
ambassadors

Q2

Project

- Release of the platform 1.0
- Activities to expand donating destinations all over the world through platform 1.0
- Starting Android/ios applications development

Volunteer

Participating in volunteer activities continually

Partnership • Merger

Building partnership many countries through
ambassadors

2021
Q2

- Reboot
- Listing on ApeSwap

CHAPTER 7

mameCoin Family

7.1 Board members

PT mameCoin Indonesia Berbagi
CEO
Senty Ariani

Graduated from the faculty of information engineering at Gunadarma University. Exhibiting the talent since her childhood, she has won at numerous awards. She is currently working as a dangdut singer. Based on her experiences of volunteer activities, she has come up with the idea of donation using blockchain, then she has established PT.mameCoin Indonesia Berbagi. Specialist in public relations.

PT mameCoin Indonesia Berbagi
COO & Komisaris
Heraldo R.M. Kalangit

Graduated from the faculty of information engineering at Bina Nusantara University.
As a PEACE BOAT staff, he trekked around the world for a long period of time.
After returning to Indonesia, he worked for a Japanese system development company as an interpreter and a project manager.
Speaking Indonesian, Japanese and English as fluently as a native speaker, he has joined in PT.mameCoin Indonesia Berbagi to become a bridge between Indonesia and Japan.
Specialist in project operations.

Corporate Information

PT mameCoin Indonesia Berbagi

Epicentrum Walk Level 3, Unit A 306 - 307, Jl. HR Rasuna Said, Kuningan South Jakarta, Indonesia

CHAPTER 7

mameCoin Family

7.2 Ambassadors

To expand the mameCoin ecosystem, we connect donation individuals/organizations and mameCoin not only through the members of our bases in Japan and Indonesia but also through accredited ambassadors.

Being domiciled in the Netherlands after traveling around the world. He has many connections in not only the Netherlands but in many countries. He supports our coming advance into Europe.

He immigrated to the Philippines 15 years ago. He has many connections in the Philippines based on his experiences of activities in a volunteer organization.

He is cooperating with us for advancing into the Philippines.

He has lived in the USA for more than 10 years. After moving around the USA, he is currently been domiciled in the Southern United States.

His major work partners are American, and he also works as an interpreter and a translator as his side jobs. He supports our work in North America.

He is domiciled in Germany and he has various connections with local communities which work using German and English.

He takes the lead to support our work in Germany.

CHAPTER 7

mameCoin Family

7.3 mameCoin getting the limelight

At the charity concert and the opening ceremony of PT mameCoin Indonesia Berbagi held on 16th September 2018 in Jakarta Indonesia, our project got a lot of coverage by many media related to business & technology including one of the biggest media in Indonesia.

Risks & Disclaimer

About Risks

The "mameCoin" token issued by PT mameCoin Indonesia Berbagi, partners and business partners (hereinafter referred to as the "Company"), carries several risks in buying and selling as noted below. For those who want to buy or sell "mameCoin", please understand that the final decision to buy or sell is a personal decision and responsibility of each, therefore please consider the risks involved, if necessary discuss this with an expert. . Therefore, if there is a loss to the buyer or seller of "mameCoin", the company or the information provider cannot be held responsible.

Risks Associated with Development

Since "mameCoin" and this service are under development, there is a possibility that the development will fail or performance may not be as expected.

Trust Risk

① Risk Management Company

PT mameCoin Indonesia Berbagi, as the management company "mameCoin" will develop, manage and operate the token. In the event of bankruptcy, there is a possibility that investment funds cannot be collected and the principal funds invested will be lost.

② Exchange Risk

When "mameCoin" is available on a cryptocurrency trading exchange, the exchange will give and receive "mameCoin" according to the transactions made. In this case, if the exchange goes bankrupt, there is a possibility that the funds involved in the transaction will not be returned and the principal funds invested could be lost. The company has nothing to do with cryptocurrency exchanges.

Liquidity Risk

The company does not promise that "mameCoin" can be exchanged on a cryptocurrency trading exchange or any other market. Then, even though "mameCoin" can be exchanged on cryptocurrency trading exchanges or other markets, the company does not guarantee its liquidity.

Operational Risk

All business related to "mameCoin", is carried out by the company or entrusted to other related companies. Therefore it is not possible to do or be ordered by "mameCoin" buyers.

Other Risks

As another risk not mentioned above, some of the services provided by the company (hereinafter referred to as "company services") are programs, so that when unexpected events such as natural disasters, fires and electrical power failures occur, transaction restrictions and bugs may occur. In addition, in the event of other failures such as damage to systems and communication lines, the functioning of the company's services may be delayed, limited or in some cases suspended. Then, suspension of company services can also occur in the event of hacking from outside parties, computer viruses that have infected company networks, leakage of confidential or personal information, destruction of equipment and other communication or system problems.

Risks & Disclaimer

Disclaimer

- The contents of this white paper or the contents of "mameCoin" can be changed, added or deleted without prior notification at the company's policy. The company is not responsible for any loss or damage caused by such changes, additions or deletions.
- The company does not guarantee the completeness, safety, reliability, quality, accuracy, availability and suitability of all the services described in this white paper. The company does not represent or guarantee anything. The company is not responsible for anything if part or all of it cannot be realized.
- Please understand that the company is not responsible (including liability for claims, contractual obligations or other legal property) for any loss or damage (whether direct or indirect, consequential damages or extraordinary losses) incurred in connection with this whitepaper.
- The information contained in this whitepaper is provided for reference only. We do not recommend, propose, offer or solicit any investment transactions.
- All products and services listed in this whitepaper are not made for the consideration of financial situation, experience and investment knowledge for everyone. It is possible that not all users will be able to implement it.
- The company does not guarantee the completion of "mameCoin" which is being developed. The company is not responsible for any loss or damage caused by not being able to use "mameCoin" because it has not been completed. In addition, when "mameCoin" is completed, the company does not guarantee that its performance will be consistent with the content described in this document. And also does not guarantee that it will be superior to other services.
- Some or all of the services described in this document and the use and trading of cryptocurrencies may be subject to restrictions based on country or territory laws. Please seek legal advice from a legal expert such as a lawyer regarding these rules and restrictions. Part or all of the contents of the document and the sale of cryptocurrency is illegal in some countries. Please obey the applicable regulations.
- Although this document has been prepared based on information we believe to be reliable, the company is not responsible for the accuracy or completeness of this information.
- Corporations and schemes described in this document are subject to change in the future.
- The content described in this document does not guarantee the environment and future results.
- The prices included in this document depend on the value of cryptocurrencies in domestic and foreign markets, the political-economic situation, the stock market, commodity prices, interest rates, etc. Therefore the value can vary significantly and in certain cases can result in large losses. In this document, the company does not make any statements or suggestions on the right treatment on the basis of accounting, law, or tax effects. In using it, please seek your own accounting, tax and legal advice to make your own decisions.
- Opinions shown here only represent the opinions of the company as of the date this document was created. We ask that every investor make the final decision regarding investing and trading cryptocurrency based on his own judgment and responsibility. The company and the sender of this information are not responsible for any loss or damage incurred by the recipient of this document.
- The company is not obliged to update the information contained in this document, although the company will continue to try to update the information in this document to a reasonable extent. Officers and employees of the company as well as other people involved in the production of this document can sell or buy the securities of other companies or other cryptocurrencies as described in this document.
- Copying, photocopying, photocopying or other means of duplicating part or all of this document is prohibited without the written permission of the company. Please contact the company for more detailed information on the cryptocurrencies described in this document.

Terms and Conditions

By using this document or any other service provided by mameCoin you agree to this Terms and Conditions. This document defined below is provided by mameCoin. For purposes of this agreement, "mameCoin" shall mean mameCoin Inc, or its affiliates and their officers, directors, managing directors, partners, and employees

Information Purpose Only

Any Information including opinions, data, news, research, analysis, prices contained herein are published for information purposes only and is subject to change at any time without notice.

Subject to Local Restrictions

All information and services contained herein are not directed at or intended for use by any person resident or located in any jurisdiction where (1) the distribution or use of such information or service is contrary to the laws of such jurisdiction; or (2) such distribution or use is prohibited without obtaining the necessary licenses or authorizations and such licenses or authorizations have not been obtained by mameCoin.

No warranties made as to content; no responsibilities to update

mameCoin makes no warranty, express or implied, concerning this service. The services provided by us and our third party providers are on an "AS IS" basis at your sole risk. mameCoin expressly disclaims any implied warranty of merchantability or fitness for a particular purpose, including any warranty for the use or the results of the use of the services with respect to their correctness, quality, accuracy, completeness, reliability, performance, timeliness, or continued availability. Neither mameCoin nor any of its third party providers shall have any responsibility to maintain the data and services made available on this document or to supply any corrections, updates, or releases in connection therewith. Availability of data and services are subject to change without notice.

No liability for content; no liability arising from use

mameCoin shall have no liability, contingent or otherwise, to you or to third parties, or any responsibility whatsoever, for the failure of any connection or communication service to provide or maintain your access to this service, or for any interruption or disruption of such access or any erroneous communication between mameCoin and you, regardless of whether the connection or communication service is provided by mameCoin or a third party service provider. mameCoin shall have no liability, contingent or otherwise, to you or to third parties, for the correctness, quality, accuracy, timeliness, reliability, performance, continued availability, completeness or delays, omissions, or interruptions in the delivery of the data and services available on this document or for any other aspect of the performance of this service or for any failure or delay in the execution of any transactions through this service. In no event will mameCoin be liable for any special, indirect, incidental, or consequential damages which may be incurred or experienced on account of you using the data or services made available on this Web site, even if mameCoin has been advised of the possibility of such damages. mameCoin will have no responsibility to inform you of any difficulties experienced by mameCoin or third parties with respect to the use of the services or to take any action in connection therewith

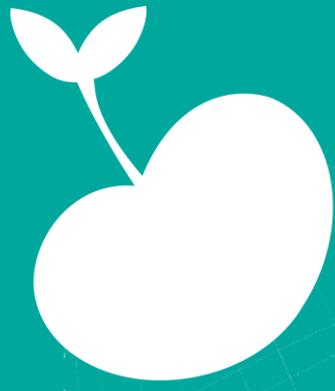

Terms and Conditions

Content not to be construed as a solicitation or recommendation

This material has been prepared for informational purposes only without regard to any particular user's investment objectives, financial situation, or means, and mameCoin is not soliciting any action based upon it. This material is not to be construed as a recommendation; or an offer to buy or sell; or the solicitation of an offer to buy or sell any security, financial product, or instrument; or to participate in any particular trading strategy in any jurisdiction in which such an offer or solicitation, or trading strategy would be illegal. Certain transactions, including those involving virtual currencies spot, futures and options give rise to substantial risk and are not suitable for all investors. Although this material is based upon information that mameCoin considers reliable and endeavors to keep current, mameCoin has not verified this information and does not represent that this material is accurate, current, or complete and it should not be relied upon as such. mameCoin will not accept liability for any loss or damage, including without limitation to, any loss of profit, which may arise directly or indirectly from use of or reliance on any information on this document

Intellectual Property Rights

mameCoin or the applicable third party owner, retains all right, title and interest including copyrights, trademarks, patents, as well as any other intellectual property or other right in all information and content including all text, data, graphics and logos on this document. Individual pages may be printed for personal or internal use only, and provided that such print outs retain all applicable copyright or other proprietary notices. All users must not, without limitation, modify, copy, transmit, distribute, display, perform, reproduce, publish, license, frame, create derivative works from, transfer or otherwise use in any other way, whether in whole or in part, any information, text, graphics, images, video clips, directories, databases, listings or software obtained from this document for commercial or public purposes, without the prior written permission of mameCoin. Systematic retrieval of content from this document to create or compile, directly or indirectly, a collection, compilation, database or directory or creating links to this document without the prior written permission from mameCoin is strictly prohibited.
